THE LIMESTONE

and the solubility of Calcium and Magnesium Carbonates

MAIN PROBLEMS

- Limestone = Insulating (loss of thermal efficiency)
- Limestone = Surfactant antagonist (greater consumption of detergents and soap)
- Limestone = Spots and deposits (tableware, cars, etc.)
- Limestone = Aesthetic problems (rough linen, unpleasant sensations on hair and skin)

HARDNESS Indicator Parameter (°F)

softening

15°F

> polyphosphate dosing: powder

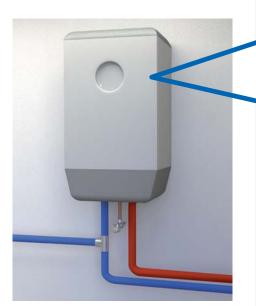

> polyphosphate dosing: crystals

> polyphosphate dosing: liquid - DOSAPUMP LP

> polyphosphate dosing: liquid

> magnets

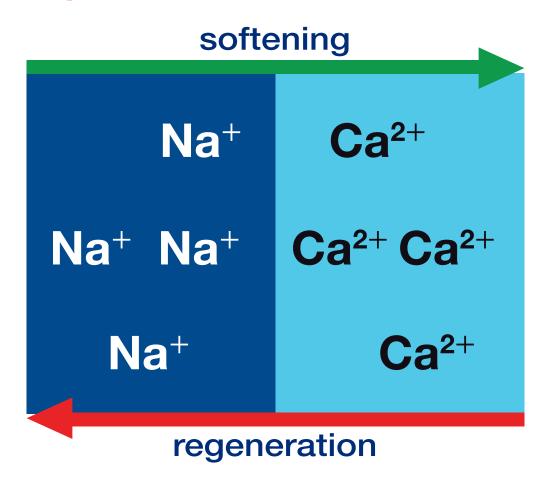

Operating Principle of a WATER SOFTENER

Ca(HCO3)2 + R-Na = R-Ca + 2NaHCO3

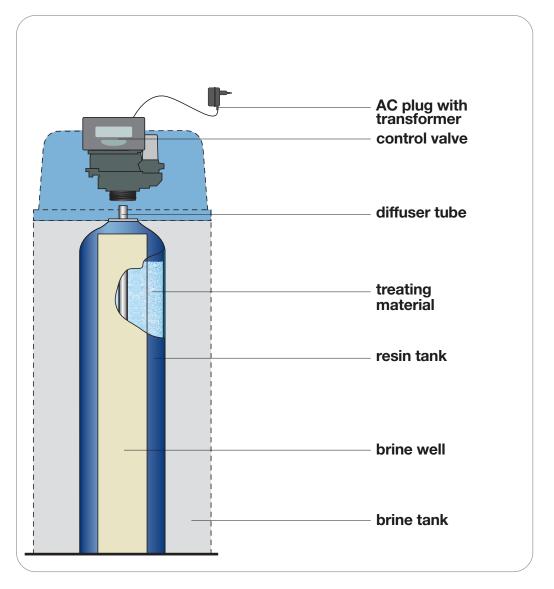

double body softeners

AC plug with transformer control valve diffuser tube treating material resin tank brine well brine tank

water softeners

> softening

DM 443/90 - Home softeners

- Device for the automatic regeneration of resins at least once every 4 days;
- Resin auto disinfection device;
- Mixer for maintaining the recommended residual hardness of 15 °F (150 mg/l)
- Sodium contents in the water not exceeding 200 mg/l of Na (law 31 on drinking water)

formulas

```
resin volume [l] = daily consumption [m³] x hardness [°F] x regeneration interval 5,5
```

cyclic capacity [m³ x °F] = resin volume x 5.5 salt consumption [g] = resin volume x 180 g

> cycle calculation

GUIDE TO THE CHOICE OF MODEL

		water hardness in °F and in ppm				
NUMBER	WATER CONSUMPTION	15-25°f	26-35°f	36-45°f	46-55°f	56-65°f
OF USERS	LITRES/DAY	152-250 ppm	260-350 ppm	360-450 ppm	460-550 ppm	560-650 ppm
2	500	JUPITER 10	JUPITER 10	JUPITER 10	JUPITER 15	JUPITER 15
3 - 5	750 - 1250	JUPITER 15	JUPITER 30	JUPITER 30	JUPITER 30	JUPITER 50
6 - 10	1500 - 2500	JUPITER 30	JUPITER 50	JUPITER 50	JUPITER 70	JUPITER 70
11 - 15	2750 - 3750	JUPITER 50	JUPITER 70	JUPITER 70		
16 - 20	4000 - 5000	JUPITER 50	JUPITER 70			
21 - 25	4250 - 6250	JUPITER 70
