ATLAS FILTRI, A STEERING FORCE BEHIND THE WATER TREATMENT INDUSTRY.

WE VALUE WHAT REALLY MATTERS. WATER!

Atlas Filtri is a dynamic and flexible, modern manufacturing company: designing, developing and producing components and systems for water treatment applicable to both domestic and industrial sectors. We are established since 1975 and being in the water filtration industry Atlas Filtri has created a name for itself in the world through constant dedication and attention to detail and innovation of products and materials...as well as the constant enthusiasm that identifies us!

As an **Italian company**, we are dedicated to engineering and designing our products in true Italian style, each of which is internationally patented. Our products are each uniquely styled to provide simplicity of use, reliability and versatility. We are very proud to declare that all of our products are **100% produced in Italy** and so reflect the reputation that the Made in Italy has all over the world. In fact, the Made in Italy concept is the core value of our way of being.

We are dedicated to following closely all the steps leading to the products realization. Starting from the innovative idea, our technicians design the product and prototype it. The realization of the mold then leads to a fully automatized production process with persistent quality control to ensure the highest-level products with the lowest levels of refuse. It is our responsibility to protect our world by keeping carbon emissions to a minimum and by producing as little waste as possible and our production strategy and material choice does precisely that.

SUCCESS NUMBERS - THE COMPANY

90% of the products
are for export.

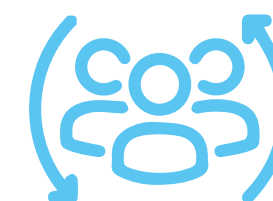

Presence in more
than **100 countries**
worldwide.

More than **165**
specialized employees.

More than **300**
distribution partners
worldwide

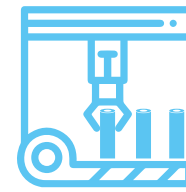

More than **3000**
customers globally.

More than **18.000 m²**
for offices, production
and logistics.

SUCCESS NUMBERS - PRODUCTION

22 robots
for cartridges
manufacturing.

Production activities
24 h/day
5 days/week.

**25 injection molding
machines** for producing
filter housings, heads,
bowls and components.

**220 tons of
polypropylene** used
per year.

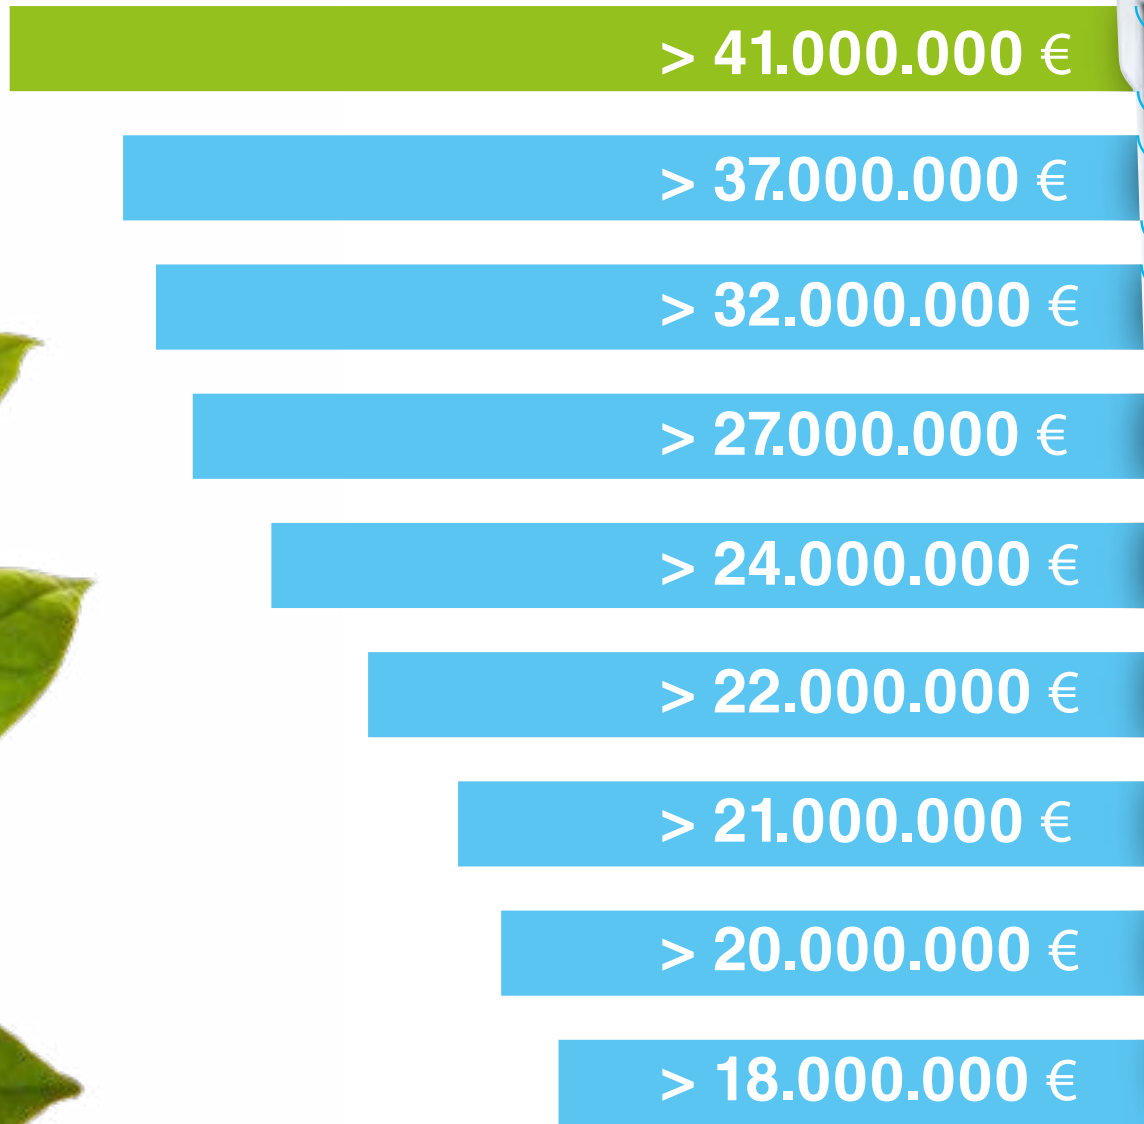

**500 tons of reinforced
polypropylene**
used per year.

More than **600
tons of PET** used
per year.

-  **BRASS**
-  **STEEL**

FILTER HOUSINGS RANGE

OASIS DP RO
RO under sink

OASIS SANIC
RO under sink, with antimicrobial technology

DOSAFOS PLUS
Non proportional dosing system.

PLUS 3P / PLUS 2P
Housings for cartridge height at 5", 7", 10" and 20"

PLUS 3P SANIC
with antimicrobial technology.

HYDRA RAINMASTER
Designed for water treatment of:
Rain / well / mains / ho.re.ca

BIG F PRO
Two stage filtration system with UV treatment.

DOSAPLUS
Proportional dosing system with polyphosphate.

PLUS HOT 3P
for hot water.

HYDROPUL
Self-Cleaning filters.

MIGNON 3P / MIGNON 2P
Single and Duplex housings reduced dimensions.

PP 3P
for water with non-neutral pH and for other liquids.

HYDRA RAINMASTER BIG
Designed for water treatment of:
Rain / well / mains / ho.re.ca

HYDRA BIG
Self-cleaning filters.

FDM 1P
Sludge filter.

DP
DP is a full range of housings for cartridge height at 5", 7", 10" and 20"

HYDRA DS
Self-cleaning filters with 360° rotational connection group.

DP BIG F
filter housings with metal frame kit.

K DP
Designed to withstand working pressure up to 10 bar.

DP SANIC
with antimicrobial technology.

HYDRA
Self-cleaning filters with innovative solutions for the self-cleaning operation.

DP BIG SANIC
with antimicrobial technology.

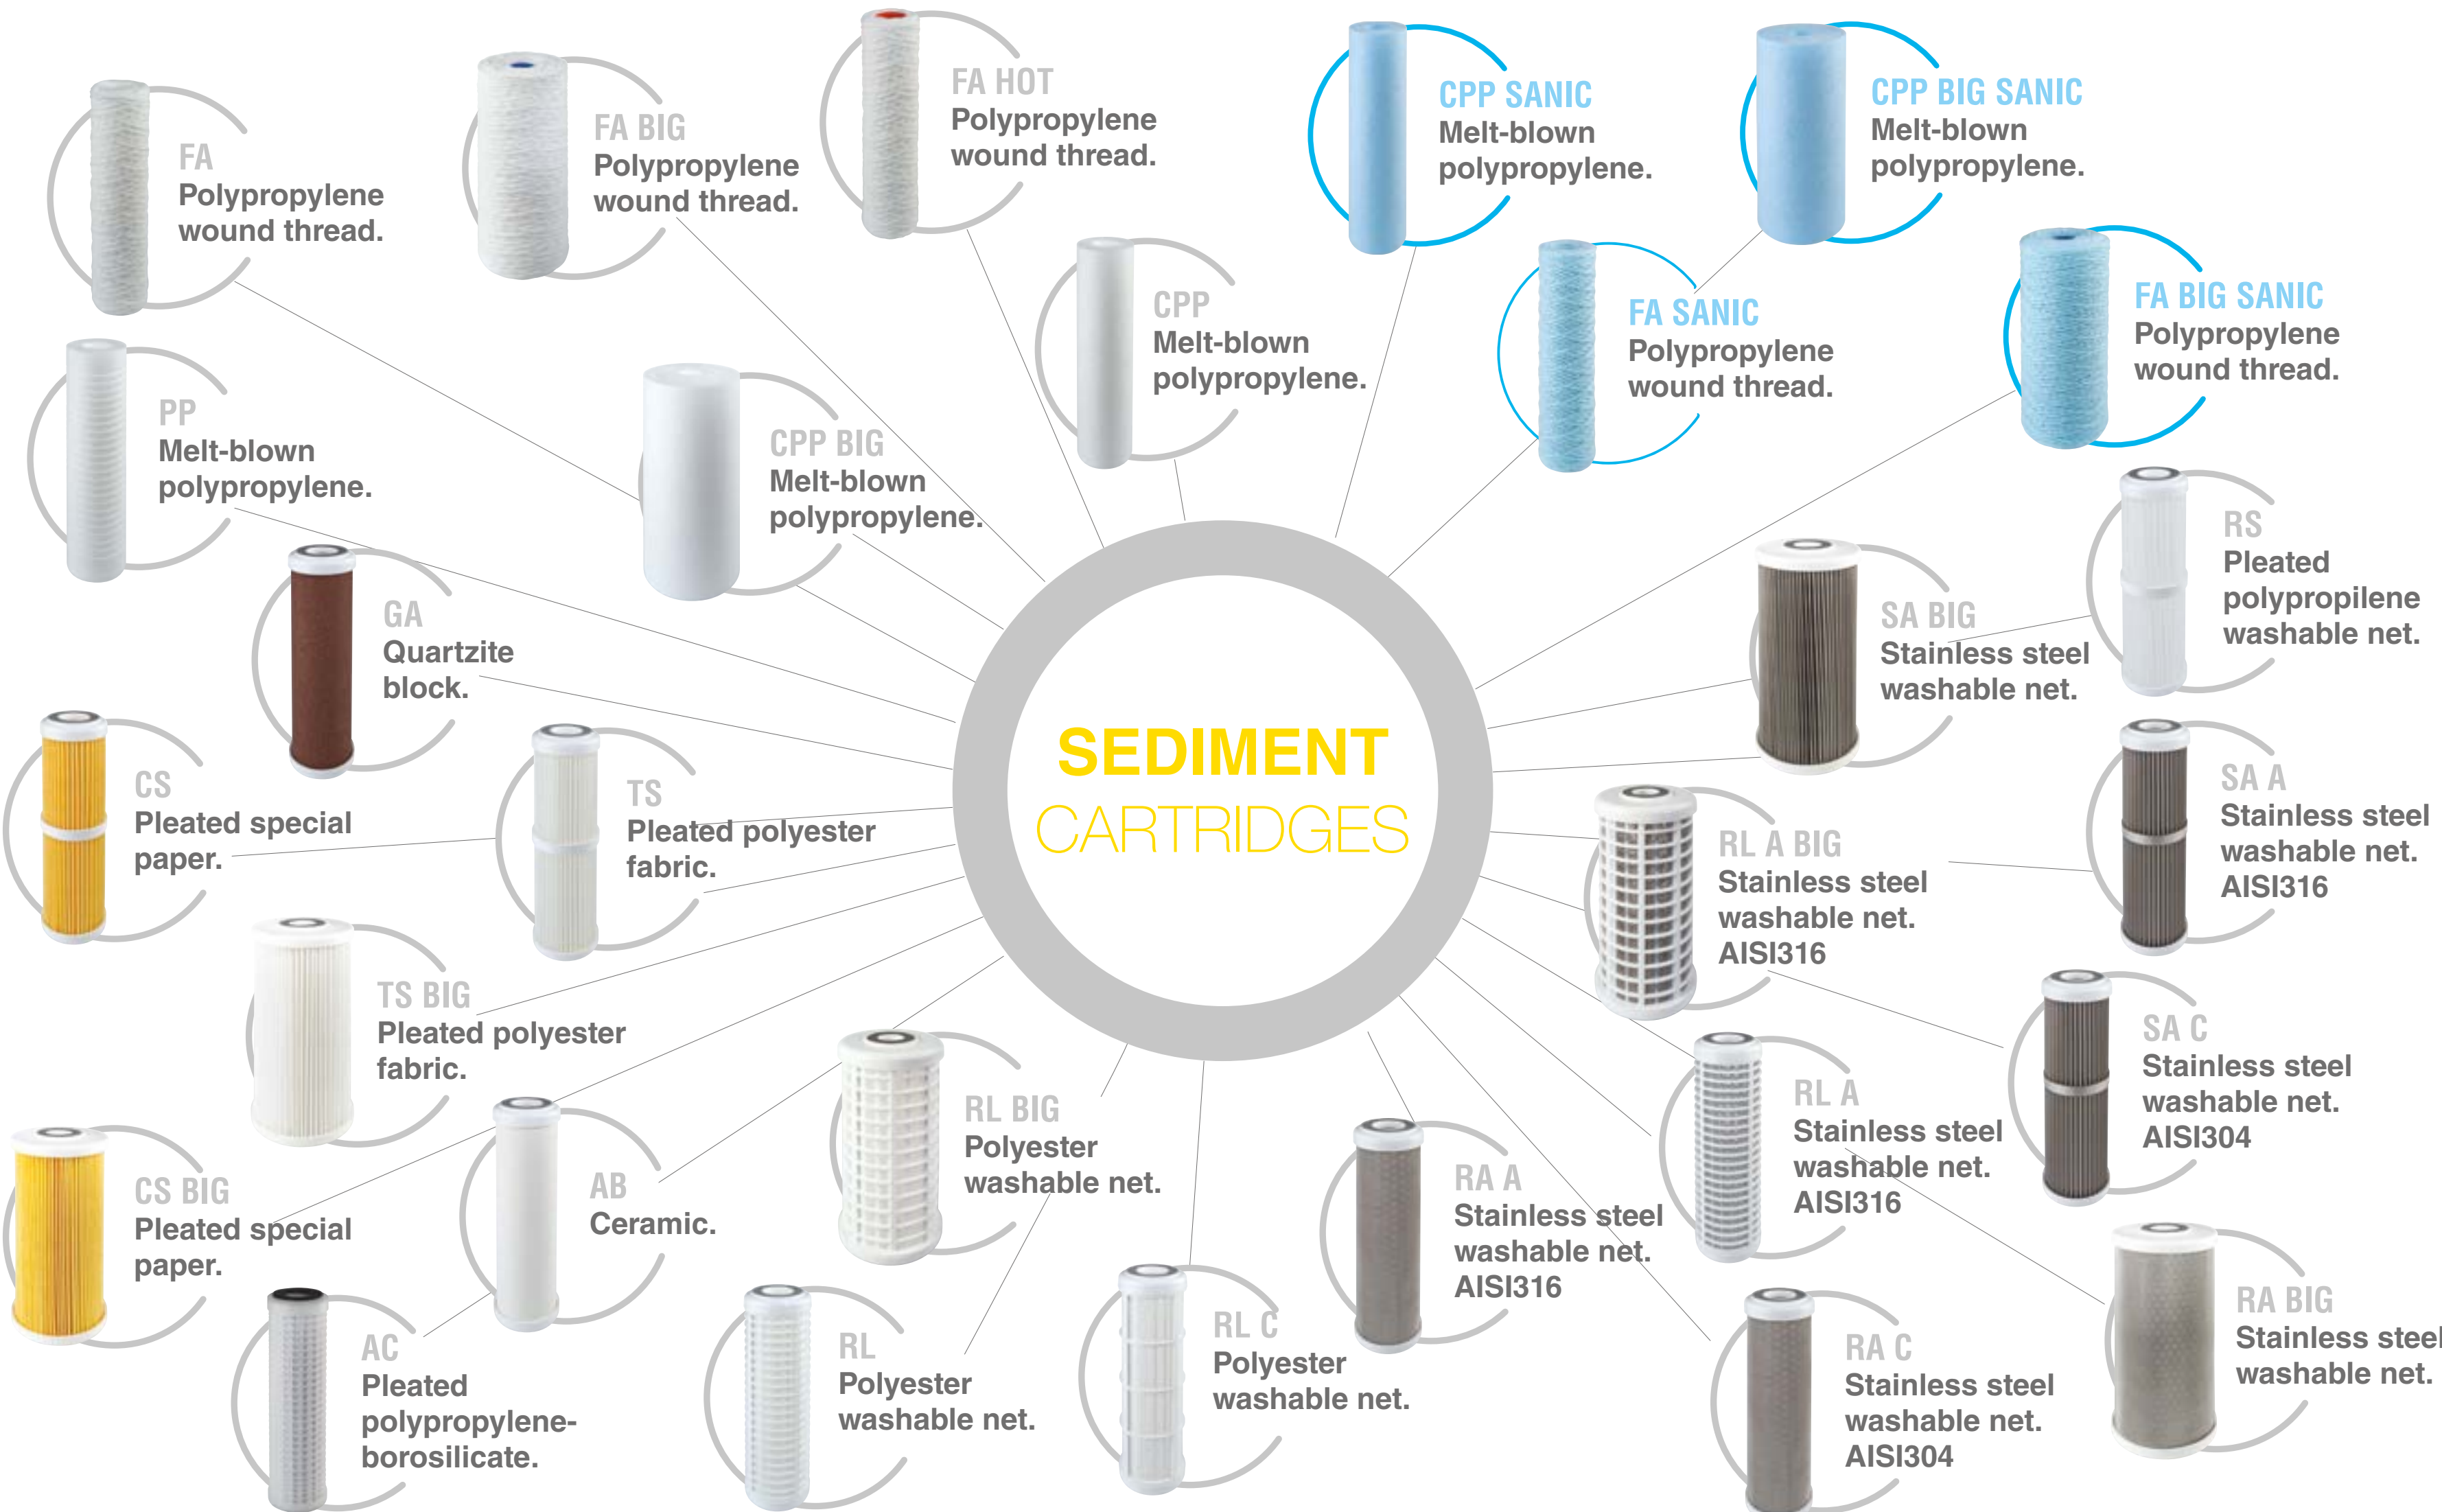

DP BIG
Housings designed to fit "BIG" filter cartridges with outer diameter (OD) 4.50"

DP DS
housings with 360° rotational connection group.

SEDIMENT CARTRIDGES

**TREATMENT
CARTRIDGES**

LA
Granular activated carbon (GAC).

HA
Polyphosphate crystals.

QA LM
Mixed bed strong cationic and anionic resin.

QA AF
Anionic resin nitrates selective.

QA AF BIG
Anionic resin nitrates selective.

FA CA
Polypropylene wound thread and (GAC).

LA BIG
Granular activated carbon (GAC).

HA BIG
Polyphosphate crystals.

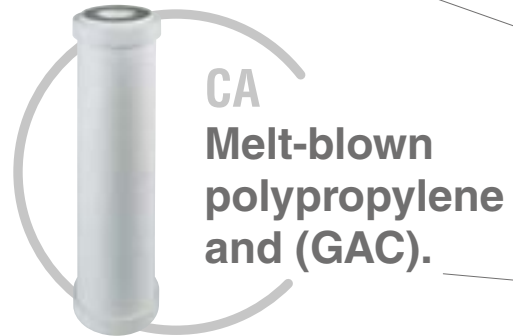

QA LM BIG
Mixed bed strong cationic and anionic resin.

QA CF
Strong cationic resin.

QA CF BIG
Strong cationic resin.

CA
Melt-blown polypropylene and (GAC).

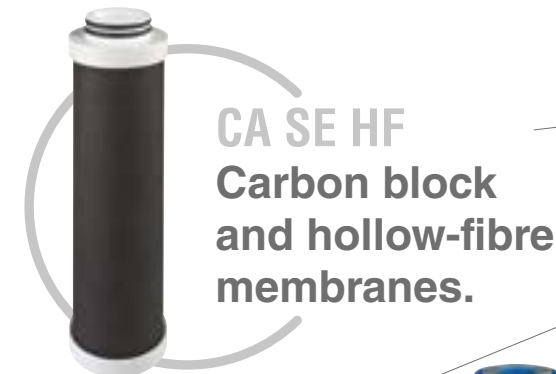

CM BIG
Mineralizing calcite

CN BIG
Neutralizing calcite

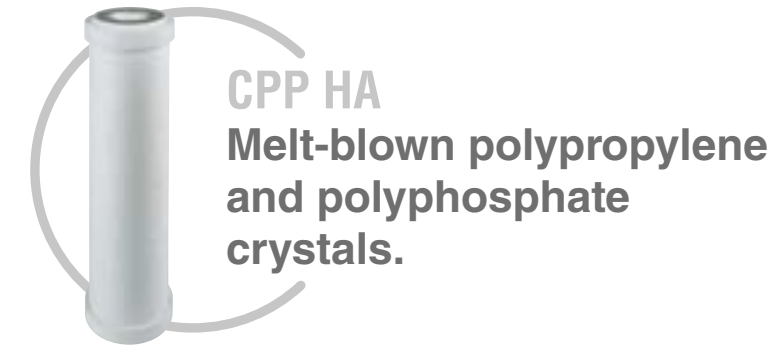

CA SE
Carbon block.

CA SE HF
Carbon block and hollow-fibre membranes.

LA HA BIG
Granular activated carbon (GAC) & Polyphosphate crystals.

CPP HA
Melt-blown polypropylene and polyphosphate crystals.

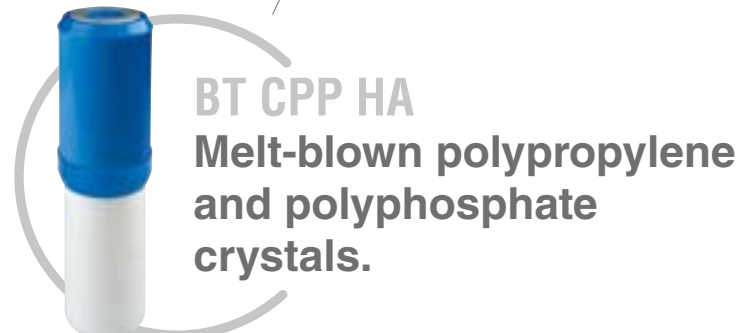

CB EC
Carbon block with outer protection sheet.

BT CPP LA
Melt-blown polypropylene and (GAC).

CB EC BIG
Carbon block with outer protection sheet.

BT CPP HA
Melt-blown polypropylene and polyphosphate crystals.

BT RL HA
Polyester washable net and polyphosphate crystals.

FA HA
Polypropylene wound thread and polyphosphate crystals.

REVERSE OSMOSIS SYSTEMS

Atlas Filtri offers Standard RO units from 40 l/h to 2500 l/h, and offers customized RO units and plants made upon specific demand, up to 50000 l/h. Models applicable for brackish water are available, as well as single stage RO units and dual stage RO units for bi-desalination designed for use in several industrial sectors and for any use requiring ultra-pure water.

ASSOCIATION

AQUA40ITALIA

A member of aqua europa, bringing together correlated industries and individuals and giving them access to national bodies and regulatory authorities involved in water quality control.

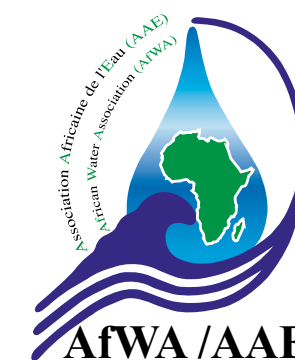

MEMBER

Us-based organization representing the industry around the world, involved in r&d in the industry and in product certification.

“International water association” bringing together experts, researchers and industry, constituting the most extensive pool of knowledge in the industry.

“African water association” for the development of water awareness, availability and quality in africa, bringing together governments, managers, researchers and industry.
