## HOW TO USE

1. Remove the old o-ring from the sump.
2. Clean and inspect all components, including the new o-ring.
3. Open lubricant package by bending at the dotted line.
4. Lubricate o-ring with a light coating of food grade lubricant (provided).
5. Place the new o-ring in the sump groove and ensure it is properly seated.

## WARNING:

- Only genuine ATLAS FILTRI components and cartridges give you optimum performance.
- Always replace o-ring at every cartridge replacement or when sump is removed.
- Always lubricate new o-rings.
