of resins

AQUARIUS

proportional cabin softeners

EXCLUSIVE DESIGN
AND HIGH PERFORMANCE

WHY CHOOSE AQUARIUS?

- Exclusive design, suitable for any environment.
- Sliding opening for easy salt loading.
- Colour touch screen
- Valve with proportional system to save water and salt
- Optional extras included: chlorine producer and salt sensor
- Intuitive interface, simple programming
- Back-up battery: in the event of a power failure all settings are kept in memory
- Holiday mode: after a long period of inactivity the resins may be subject to bacterial growth, with holiday mode they are always disinfected and protected.

Electronic valve with piston technology: maximum reliability.

Double protection: overflow fitting + safety float.

Quick and easy installation thanks to the integrated by-pass.

Salt consumption among the lowest in the market: 120 g per litre of resin.

Turbine integrated in the by-pass, ultra-compact valve.

Proportional countercurrent regeneration and adjustable backwash function: saving approx. 8000 l water/year.

model

AQUARIUS 1

Resin volume:

 = 12,5 lt.

Salt consumption for regeneration:

 = 1,2 Kg

Salt load capacity:

 = 24 Kg

Resin type:

 = high capacity of exchange

model

AQUARIUS 2

Resin volume:

 = 25 lt.

Salt consumption for regeneration:

 = 2,4 Kg

Salt load capacity:

 = 64 Kg

Resin type:

 = high capacity of exchange

Maximum incoming water hardness 50°F (500ppm CaCo3)

*Cabin proportional softeners
Aquarius are designed to enclose
high performance and technology in
an exclusive design.*

We value what really matters. Water
