CERTIFIED SCALE REDUCTION -86%*
BLOCKS SCALE - PROTECTS PIPES - REDUCES CONSUMPTIONS

ScaleArmor™ ROCK is the IAPMO Z601 certified system that prevents limescale build-up with 86% effectiveness compared to untreated water.

ScaleArmor™ ROCK prevents the build-up of limescale and deposits on surfaces and also reduces pipe scale build-up. It does not soften the water, but prevents the growth of calcium and magnesium carbonate crystals that form limescale.

ScaleArmor™ ROCK is a ready-to-use kit that contains: housing, cartridge, spanner, wall bracket, o-ring, lubricant and instructions.

To maintain certified effectiveness, use only the original ScaleArmor™ jar refill: 1 refill = 1 full cartridge.

*ScaleArmor™ ROCK: certified scale prevention up to 86% in comparison with an untreated system.

- Test specimen was conducted in a tankless system.
- Water heated to 72.2 °C
- Synthetic water was used in testing
